*** MCV4: Dose 2 should be given 5 years after dose 1.

Presbyterian Health Plan recommends the Center for Disease Control and Prevention Immunization Schedule which is updated annually. If you have any questions you can access the CDC website at <http://www.cdc.gov/vaccines/schedules/index.html>. You can also contact New Mexico Immunization Hotline toll free at 1-866-681-5872 or online at <http://www.immunizenm.org/sched.shtml>. Services are funded in part under contract with the State of New Mexico.

Shots can be given even when your child has a minor illness. If your child is not up-to-date, your child's Primary Care Practitioner can make a plan to make sure all shots are complete. Take your child's shot record with you to every healthcare visit.

Your child's Primary Care Practitioner may adjust this schedule based on what is best for your child.
Remember, your child is not protected against these diseases until all doses have been given.

Presbyterian exists to improve the health of the patients, members, and communities we serve.
