

2016 Medical Specialty Solutions Program Utilization Review Matrix

Listed below are the Current Procedural Terminology (CPT) codes for all authorized CPT-4 codes to request prior authorization for both non-emergent advanced diagnostic imaging procedures and cardiac-related imaging procedures performed in an outpatient setting. This matrix is designed to assist provider with correct coding for services and avoid unnecessary payment delays.

If a procedure is authorized, then any of the corresponding “Allowable Billed Groupings” procedure codes listed could be submitted on a claim representing that service. Claims will be subject to eligibility, correct coding edits, and medical necessity requirements. The services must be performed during the authorization period.

An exact match is required between the authorized CPT code and the billed CPT code or the “Allowable Billed Grouping” listed in the matrix. If a match does not occur within the matrix, then claims may be subject to denial. Add-on codes are based on the primary code and will be subject to the same medical necessity criteria.

Please note that services rendered in an emergency room, observation room, surgery center, or hospital inpatient settings are not included in the Medical Specialty Solutions program. Please refer to Presbyterian’s authorization guide for services performed in these settings.
