

August 15, 2016

Dear Community Member,

Thank you for participating in the community health forums Presbyterian held throughout New Mexico in 2016, which helped us complete Community Health Needs Assessments and Implementation Plans in each of the counties where we serve the most patients. We appreciate your time and input – both were essential as we developed the interventions for our 2016-2019 implementation plans. If you were unable to participate, we appreciate your interest in the Presbyterian community health work and encourage your feedback.

The plans are available for review and reference on our website, phs.org. The direct link is phs.org/community/supporting-community-health-in-new-mexico. We are excited to be initiating several of the steps outlined in the plans as we continue to work toward improving the health of New Mexicans. Presbyterian has been serving the healthcare needs of New Mexico for 107 years. We look forward to continuing the relationships we established before and during the planning process and are always eager to hear your questions or comments about Presbyterian's commitment to community health.

Thanks again. We hope you find the time to review our Community Health Needs Assessments and Implementation Plans and share them with others.

Sincerely,

A handwritten signature in black ink that reads 'Leigh Caswell'.

Leigh Caswell, MPH
